-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3731

Claims 1 and 4 are rejected under 35 U.S.C. § 103 as being unpatentable over Middleman in view of Yoon. Making the Middleman hollow shaft 11 pointed in order to more easily penetrate tissue would have been obvious in view of the Yoon teaching of providing such a point 46 on hollow shaft 32. Note figs. 9-10 of Yoon which show grasping means 132, 134. Note fig. 9 of Middleman which shows a hook-shaped configuration at 104 and 105.

Claim 2 is rejected under 35 U.S.C. § 103 as being unpatentable over Middleman in view of Yoon as applied to claim 1 above, and further in view of Knoepfler. Making the Middleman shaft 11 curved in order to reach normally inaccessible areas in the body would have been obvious in view of the Knoepfler teaching of providing a curved shaft for this reason.

Claim 3 is rejected under 35 U.S.C. § 103 as being unpatentable over Middleman in view of Yoon as applied to claim 1 above, and further in view of Hasson. Providing a spring to automatically retract the Middleman wire-like jaws inside of the shaft in order to make the instrument easier to operate would have been obvious in view of the Hasson teaching of providing spring 44 for this reason.

This is a continuation of applicant's earlier Application No. 09/742,023. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
